Introduction

G-NAF (Geocoded National Address File) is the trusted physical address index for Australia. It contains the state, suburb, street, number and coordinate reference or geocode for street addresses in Australia. G-NAF uses existing and recognised address sources (referred to as contributors) including the State and Territory Government land records, as well as address data from the Commonwealth Government and other national sources. For more information, please refer to the G-NAF Product Description.

1.1 Document Purpose

This document provides a description of the issues, changes, features, updates and overarching statistics relating to the applicable data release. This document should be read in conjunction with the relevant Product Description.

1.2 Audience

This document is made available to Geoscape staff, data contributors, direct clients and end users. It is intended to be used by business managers, data managers and analysts as a guide and reference to understanding the content and variations within a data release.

Overview

- Nationally, the February 2026 update of G-NAF shows an increase of 32,711 addresses overall (0.21%). The total number of addresses in G-NAF now stands at 15,860,127 of which 15,015,573 or 94.67% are principal.
- The confidence level distribution nationally for the February 2026 release has the confidence 2 addresses increasing by 38,470 from the November 2025 release with the total percentage of confidence 2 addresses increasing to 69.44% of principal addresses. The number of confidence 1 addresses has decreased by 7,667 and represent 14.13% of all principal addresses while confidence 0 addresses have decreased by 1,412 and represent 16.42% of addresses.
- With respect to address reliability, there was an increase of 34,887 address-level, a decrease of 3,846 in street locality addresses and an increase of 1,174 in locality-level addresses. The reliability of principal addresses in G-NAF is now made up of 98.12% address-level, 1.84% street locality addresses and 0.04% locality-level addresses.

2.1 Release Summary

2.1.1 Update summary

- New Localities in G-NAF.
- For details on these updates, refer to the 'Change Notification' section in this report.

2.1.2 Issues summary

- Impact of Cadastral shifts in Victoria.
- For more information refer to the 'Issues' section on these issues.

2.1.3 Future Considerations

- Details of these changes can be found under the 'Future Considerations' section of this report.

Change Notification

3.1 Enhancements

3.1.1 New Localities in G-NAF

There is one new locality for the February 2026 Release of G-NAF, the locality of Asche in the Northern Territory.

3.2 Notification of Change

None to report

Issues

4.1 New Issues

Nothing to report.

4.2 Resolved Issues

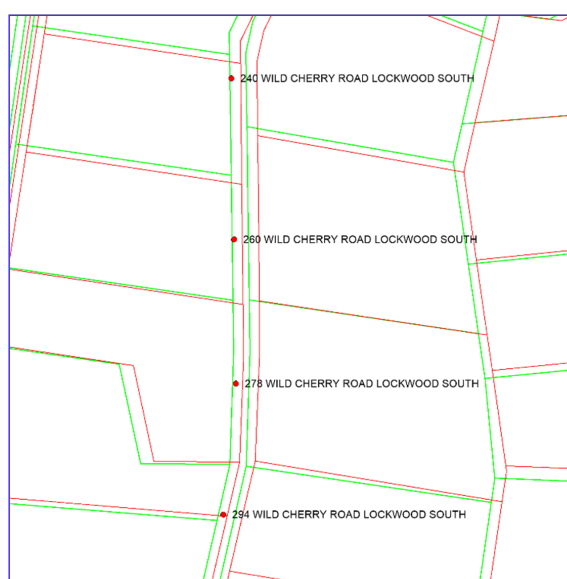

Nothing to report.

4.3 Ongoing Issues

4.3.1 Impact of Cadastral shifts in Victoria

As noted in the November 2022 G-NAF Release Report, there have been upgrades to the cadastral and property boundaries in Victoria. While the bulk of the changes expected have now been applied to the Geoscape Cadastre and Property, updates may continue in more localised areas to address anomalies that remain after the bulk updates.

As noted previously, some anomalies as a result of these changes remain, for example, in a small number of cases the address geocode has not been moved by the jurisdiction resulting in the address geocode being located in the road casement, as shown below, and it is not known at this time when these geocodes will be moved by the jurisdiction back within the parcel boundaries.

Green cadastre is the spatially adjusted cadastre

Red cadastre is the cadastre before adjustment

As can be seen these addresses are now located within the road casement as a result of the 12 metre shift which occurred along this road.

4.3.2 Other ongoing changes

- Identifying and creating principal–alias address relationships including address de-duplication.
- Ongoing validation and removal of sensitive information in the building_name, address_site_name and geocode_site_name attributes.
- Targeted address improvements and corrections as required.

Future Considerations

This section outlines enhancements under consideration, but not planned into a specific release. For further details on these please contact Support.

5.1 Further improvements

Geoscape will continue to implement further improvements to G-NAF based on additional address contributions from reliable sources. The improvements will be documented at the time of the release where changes are made based on the additional address contributions.

Summary Statistics

Note

The statistics below do not include “retired” addresses (i.e. Confidence =-1)

Table 1: Geocode Reliability of Principal Addresses Only

Reliability	No of Addresses	Percentage	Change since Nov25
1 (GPS derived address level)		0.00%	
2 (Within address site boundary)	14,621,831	97.38%	35,765
3 (gap geocoded)	110,872	0.74%	-878
4 (street level)	276,630	1.84%	-3,846
5 (locality level)	6,240	0.04%	1,174
6 (topo level)		0.00%	
No geocode		0.00%	
Total	15,015,573	100.00%	32,215

Table 2: Address Confidence Levels of Principal Addresses Only

Confidence level	No of Addresses	Percentage	Change since Nov25

ACT	279	231	1	278
OT	0	0	0	0
TOTAL	54,463	52,338	2,042	52,421

Annex A - Detailed Statistics by Jurisdiction

The following Confidence and Level Geocoded tables show the changes that occur to principal only addresses between the new release (August 2025) and the previous release (May 2025) for each jurisdiction. The table shows information on the change in the two far-right columns, one shows the count difference between two releases (No of Addresses) and the other the percentage of change based on the total of all principal addresses (Address %). The statistics below do not include “retired” addresses (i.e. Confidence = -1).

7.1 Victoria

Table 1: Address Summary - Victoria

Address Summary - Vic	All Addresses	Principal Addresses	
	No of Addresses	No of Addresses	% National Total
Feb 2026	4,157,266	3,940,659	26.24%
Nov 2025	4,146,395	3,930,895	26.24%
Change	10,871	9,764	0.01%
